

## Motivation Letter

Alexey Tukalo,  
EFA12SF,  
Information Technology,  
Savonia University of Applied Sciences

June 16, 2015

Dear Madam or Sir,

I am student of Savonia University of Applied Sciences and my University takes part in the exchange program, that's why I have a brilliant opportunity to apply for an internship at Karlsruhe Institute of Technology. In my point of view it will mean a lot for me and my future career prospects.

My field of studying is an information technology and I know that the Institute is one of the most respective one in this field in Germany. I also really like the project which I am going to join because I am very impressed by the idea and perspectives which will be opened for an accurate diagnostics of many diseases. In addition I am very interested in the position, because it is related with a digital image processing<sup>1</sup>. I have been digging into this field for a long time and I hope that the internship will improve my knowledge and skills in this significantly. Moreover, I want to get real-life experience in a field of Java and Object-orientated programming and the placement will help me with in it.

So, I am also very impressed by the nature around Karlsruhe, because it is totally different from the one of Karelia<sup>2</sup> and Finland which is well known by me. In fact it is especial interesting for me because I am interested in landscape photography and I would be very happy to have an opportunity to take a pictures of this beautiful land. Last semester I have spent in Ireland<sup>3</sup> and I liked the mountains, but they are not as high and great as the German Alps. I have never been in Germany, but I am also very delighted by German Gothic architecture.

However, exchange is also an excellent chance to get a lot of new friends around whole Europe or may be world. The network of acquaintances can be very useful for business contacts and just friendship in future. I think that every person which I meet during my life can teach me something and the exchange in Karlsruhe is good chance for me to meet a lot of new people with different cultural background, habits, lifestyle and so on. In some cases it would teach me a lot.

It would interesting for me to touch the German culture of business and work, because Germany is famous for the biggest economics in Europe. I think that this experience would help me to understand business process better. I would be very grateful if you consider my application and give me permission to participate in the programme at KIT, I think it would change my CV a lot, makes me more motivated and confident.

Thank you very much in advanced for your consideration.

Yours faithfully, Alexey Tukalo

---

<sup>1</sup>My hobby is photography and color-correction, I also have studied visual art for a long time, so I am really deep into graphics and visualisation, my eyes are very trained, that's why my dream is to combine the experience with my programming skills

<sup>2</sup>the part of Russia where I was born

<sup>3</sup>I took part in an Erasmus+ exchange program and I studied for one semester in IT Tralee, it improved my English and professional skills a lot.
