

Database

Pricelizer

May 5, 2015

Our server is running inside siteground.com hosting, so to get an access to the database first of all we should login ourself to the siteground.com. You can see the login field on the fig. 1.

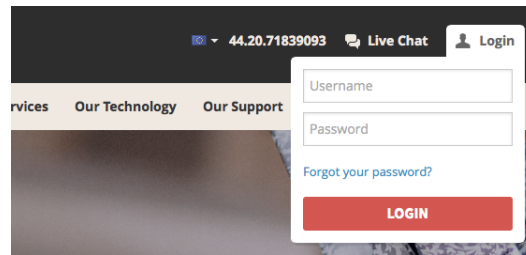

Figure 1: Login filed

After that you need to get an access to cPanel, for it you have to press the button (figure 2) and enter the login and password for cPanel at the login page.

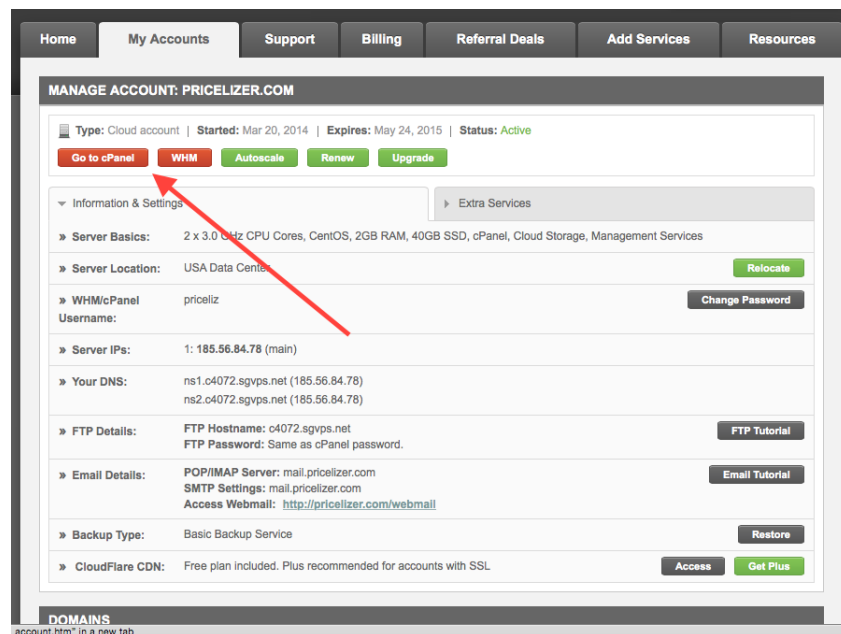

Figure 2: cPanel button

You can find the database tools(fig. 4) if you'll scroll down on the main page of cPanel until database section (fig. 3).
