Dear Madam, Sir,

I am a student of Savonia UAS, Kuopio, my field of study is an Information Technologies.

My bachelor degree program include summer internships and now I am looking for it.

I am interested in GUI[1] and game[2] development. Also I have had an experience in SQL databases[3], digital signal processing, artificial intelligent for games and control engineering. My first programming language is C, so I fond of C like programming languages: C++, Java, C# and JavaScript. Right now I am learning JavaScript's framework D3.js[4] by myself, because in future I am going to get Master Degree in Data Science and Data Visualization is one of the main fields of Data Science.

Right now, I am tacking part in Erasmus+ exchange program and this part of the studying year I am going to study at Institute of Technology Tralee, Ireland. I will learn Computer Service Management, System Architecture, Visual Communication, Big Data[5] and Game Mechanics[6], here. I also will have an opportunity to improve my English by native speakers surrounding.

In childhood I studied Visual Art for 6 years, so I am able to draw, also I am familiar with Adobe Photoshop and Illustrator.

My hobby is photography[7] and raster / vector graphics.

I think that every person which I meet during my life can teach me something. The internship in German is a good chance for me to get to know a lot of new people with different from mine cultural backgrounds, habits and lifestyles. I think I will have an opportunity to learn a lot during the internship and my learning will be not only connected with field of study. For sure the internship will change my point of view a lot. It will make me more open mind person and better specialist.

Thank you for spending your time and reading my cover letter.

Thanks you,
Best regards,
Tukalo Alexey,
EFA12SF, Savonia UAS
